OUR SERVICES

EXPERTS IN TRANSLATION & LOCALIZATION

Our range of language services and solutions is more comprehensive than ever before, and we are fully ISO compliant. We have the translation technology to manage complex translation projects, in various file formats and across many languages.

MULTILINGUAL WEB & APPS

Our engineers have the programming knowledge necessary to develop a website or an app and convert it into a bilingual or multilingual application, in order for our clients to reach their customers worldwide.

QUALITY ASSURANCE SYSTEM

Over the last decade, ITLOCAL designed a specific Quality Assurance Process which allows for both consistency and client-specific customization. Our clients receive a tailored product, including specific glossaries, Language Conventions and Word Instructions.

Choose the ideal service for your project while keeping within your budget

PREMIUM

HUMAN TRANSLATION, EDITING, AND PROOFREADING (**TEP**)

Ideal for corporate content, including website and software localization, as well as technical, legal, medical documentation, and marketing brochures. Standard 2-step translation and editing process in compliance with ISO 17100. Involves at least one native translator, a subject-matter expert reviewer and itlocal Quality Control.

ECONOMY

CUSTOM AI/MACHINE TRANSLATION AND HUMAN EDITING (**FULL MTPE**)

Translations tailored for basic projects, ideal for materials aimed at learning and understanding: manuals, guidelines, or standard procedures. AI-assisted translation utilizing our MT engines and Translation Memories, followed by a revision by a native target-language reviewer with subject-matter expertise and itlocal Quality Control.

We have the latest software and technologies

DTP

We work with all major Desktop Publishing (DTP) software including the latest released versions of Adobe PageMaker, FrameMaker, InDesign, Photoshop, Illustrator, MS Office, amongst others, on both Windows and Mac.

CAT

We work with platforms like MemoQ, Phrase, Wordbee, and SmartCat. Our primary CAT Tool is SDL Trados/Studio, which analyzes source files and identifies Matches, Fuzzy Matches, and No Matches. We also utilize Translation Memory (TM) technology to store and reuse previously translated segments, enhancing consistency and reducing turnaround times and costs, thus improving our workflow efficiency.

QA

Translation Quality Assurance (QA) software is used to compare the source and the target versions of the text. We use: SDL Synergy, HTML QA, QA Distiller, Altova XMLSpy, Alchemy Catalyst and others.

APPS

Our most powerful software localization tool, SDL Passolo is fully compatible with the Microsoft .NET framework. It can directly handle a large number of software specific file formats. Our team uses modern web design technologies such as Html, Wordpress, Magento for Mac and Windows. Our experienced staff helps clients save time and money in the creation of web-ready content.

INDUSTRIES WE SERVE

Software & Websites

Translation for Gaming

Media & Marketing
